

Timelock Cash Containers

*Type 1
Container*

Two types of Time Lock Cash Container are available:

The Type I Container is intended for mounting on a counter top at point of sale and is normally bolted to the counter top, although provision can be made to secure the unit to a vertical wall.

The Type II Container is designed to be built in under the counter point of sale position. This unit is equipped with a drop down door to eliminate the danger of injury to personnel from a projecting door.

Type 2 Container

IIC Timelock Cash Containers are manufactured to an IIC design and are equipped with an advanced high-reliability Kaba-Mas electronic lock that can be programmed with delays of one to 99 minutes.

The units are subject to stringent manufacturing and inspection procedures prior to shipment that are in accordance with the company's ISO 9001:2008 procedures.

Cash can be readily deposited through an entrance slot in the container door. The containers are intended for use at "Point of Sale" positions and provide for the safe deposit of cash taken during the day prior to either collection or deposit in a heavier safe for overnight storage.

Whilst initially developed exclusively for Australia Post, these containers are available for sale to operations that may have a need for the short term storage of cash prior to collection or movement to a more secure storage facility.
